Analgesic Gases

"Managing pain should be a top priority in an emergency. Specialised training is essential to the safe administration of analgesic gases"

'Analgesic Gases' is specifically for people with access to analgesic gas medication. It is invaluable due to the real-world emergency medical experience our instructors hold – participants will gain practical training that is **truly relevant in an emergency, provided by instructors who have dealt with REAL medical emergencies** & have both medical & teaching qualifications.

COURSE AIM

The **'Analgesic Gases'** course will **provide participants with the skills & knowledge to begin to manage pain associated with first-aid emergencies.**

CONTENT

Based on proven emergency practice and taught by instructors with real-world medical experience, the course consists of:

- Relevant legislation & requirements
- Types of pain & causes
- Assessment of pain
- Uses for analgesic gases
- Adverse affects of analgesic gases
- Storage & records
- Working with emergency services

PRE-REQUISITES

Current Occupational First Aid qualification (or equivalent).
